Color extensions with the **xcolor** package — **pstricks** examples

Dr. Uwe Kern* v2.13 (2021/10/31)

This document is not suitable for pdfIATEX! Please use IATEX + dvips etc.

Figure 1: Modified version of an example from the pstricks manual; requires pst-tree

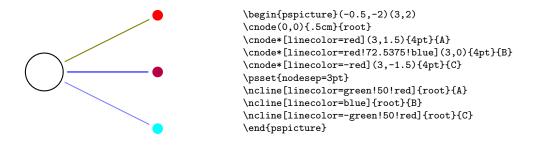

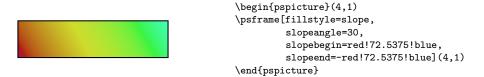

Figure 2: Moving from one color to its complement; requires pst-slpe

^{*}This file is part of the xcolor distribution which can be downloaded from the CTAN mirrors (macros/latex/contrib/xcolor/) or the homepage www.ukern.de/tex/xcolor.html. Please send error reports and suggestions for improvements to https://github.com/latex3/xcolor/issues.

Figure 3: Explicit color specification via a loop command; requires multido

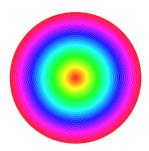

Figure 4: Color series — modified version of an example from the pst-fill manual; note that the \multirput command does not give the desired result here
